

Demountable Office Fronts

A Sustainable Interior Design Solution

Efficient, attractive and cost effective office solution

Demountable frame designs by Frameworks provide building owners and tenants with a practical solution for ever-changing office layouts. These interior aluminum frames offer an environmentally-responsible, aesthetically-appealing, cost-effective, and efficient alternative to traditional construction.

- Made of recyclable materials
- Creates better daylighting for reduced energy costs
- High quality craftsmanship and construction
- Aesthetically-appealing: sleek, clean lines with glass walls
- Multiple design options, including swinging or sliding doors
- Beautiful prefinished paint or anodized aluminum

For ease of installation and removal, perimeter components attach to setting channels, which mount directly to the floor, ceiling, and walls. Demountable walls are much quicker to reconfigure when changes are needed, allowing for faster occupancy.

The DOOR

Aluminum stile and rail

- Sleek design matches the frame finish
- Various stile and rail sizes available
- Full glass cutout provides daylighting and creates an open environment with privacy
- 1/4", 3/8" or 1/2" thick glazing options

Wood

- Combine the warmth of wood with the sharp lines of aluminum
- Contemporary flush wood door design
- Various species and stain options
- Serenity doors for sound control
- FSC Certified

The FRAME - Two demountable options

Slim Slider

- Top hung sliding door with sidelights spanning the full office
- Narrow stiles and minimal frame profiles allow for daylighting with a contemporary design
- Various design options including corner and "T" conditions
- Smooth, quiet door operation
- 1/4" or 3/8" thick glazing options

Type II

- Swinging door frame with attached sidelights
- Multiple profiles available
- Various design options include vertical and horizontal mullions as well as corner and "T" conditions
- 1/4", 3/8", or 1/2" thick glazing options as well as a double glazed system for maximum sound reduction

The HARDWARE

Sliding Doors

- Decorative pulls from Rockwood Manufacturing are available in a variety of finishes including stainless steel, leather-wrapped and with wood inserts, in various lengths and shapes. Locking pulls, with cylinder-operated flush bolts concealed in the door pulls, are ideal for securing doors in both sliding and swinging applications.
- Deadlocks from Adams Rite are designed to answer the security needs of sliding doors in commercial buildings.

Swinging Doors

- Cylindrical and mortise locksets are available with a variety of decorative levers, in beautiful architectural finishes from Corbin Russwin and Sargent Manufacturing.
- Decorative hinges from McKinney, designed to suite with latching hardware, ensure aesthetic continuity.
- Deadlocks, deadlatches and aesthetic trim from Adams Rite are designed to complement the clean lines of modern doors.
